

# Slack & Github

BIOfficine first meeting | 26<sup>th</sup> April, 2021

**#SLACK**

**#TEAMWORK**

**#CONNECTION**

**#ORGANIZED**

---

# Slack

- <https://slack.com/intl/it-it/>
- Organizing the work, helping connections and sharing docs
  
- Free and paid version
- > 700,000 enterprises use it

## How to use it

- Working areas
- Personal chats
- **#channels** > related to a topic, people can join the channel to remain update about it quickly and easily
- integration with other apps (Drive, Hangouts, Github, and so on)

---

# Slack examples

**#GITHUB**

**#OPENSOURCE**

**#CODING**

**#REPOSITORY**

---

# Github

- <https://github.com/>
- social network for developers and code enthusiasts (collaborations for coding)
- system for managing the development of collaborative software
- free and paid versions (related to space)
- **open source projects**

## How to use it

- write and upload via an account
- download open source documentation (and codes) written by anyone
- codes of your research (repository of published open source softwares)

---

**#SPOILER!**

---

# Ideas for the next session

With the help of **Daniele D'Arrigo** (XXXIV TeCSBi):

- **Mendeley** - managing bibliography for your research!
  - Plugin to share refs in private groups and collect refs directly from docs

And:

- **Overleaf**: create perfect drafts with journals templates, but not only! CVs, letters, thesis... in Latex
  - sharing docs
  - write directly in journals templates
